PROFILE

Passionate Frontend Developer with a strong foundation in crafting responsive and visually engaging web applications. Transitioning from an engineering background, I bring problem-solving expertise and an analytical mindset to frontend development. Proficient in modern web technologies, I create seamless user experiences with clean, maintainable code. Committed to continuous learning and leveraging creativity to deliver innovative solutions that exceed user expectations.

November, 2015 — April, 2022

B. Tech • LADOKE AKINTOLA UNIVERSITY OF TECHNOLOGY

EXPERIENCE

Frontend Developer Trainee SAIL (Tech Talent Program)

January, 2024— August, 2024

- Developed responsive clone websites, including a pixel-perfect YouTube replica, showcasing proficiency in HTML and CSS.
- Designed and implemented frontend projects to strengthen UI/UX expertise and deliver user-centric designs.
- Leveraged React.js and Tailwind CSS to create dynamic, responsive web interfaces.
- Collaborated with cross-functional teams on projects, leading the frontend implementation for a team-based React.js project.
- Applied debugging skills to ensure optimal website performance and resolve technical issues effectively.
- Gained hands-on experience in version control systems like Git, ensuring streamlined collaboration and efficient code management.

- Enhanced knowledge of agile development practices and participated in sprint planning and retrospectives to ensure timely project delivery.

TECHNICAL SKILLS

Frontend Development: HTML, CSS, JavaScript, React.js, Tailwind CSS
UI/UX Design: Responsive Design, Wireframing, Cross-Browser Compatibility
Development Tools: Visual Studio Code, Git/GitHub, Figma
Additional Skills: Debugging, Performance Optimization, Accessibility.

PROJECTS

YouTube Clone
- Built a fully responsive clone of YouTube using HTML and CSS, demonstrating a deep understanding of layout design and responsive principles.
- Integrated accessible design principles to enhance user inclusivity.

Portfolio Website
- Designed and developed a personal portfolio website to showcase projects and skills using HTML, CSS, JavaScript and Tailwind CSS.
- Integrated animations and interactive elements for an engaging user experience.
- Deployed the website using modern hosting platforms, ensuring fast loading times and scalability.

Team-Based Web Application
- Collaborated in a team of developers to create a task management web application. Focused on the frontend interface using React.js, ensuring responsiveness and intuitive navigation.
- Optimized application performance, achieving significant improvement in load times and user interaction.

Weather Application
- Created a weather forecast application using JavaScript and APIs to fetch real-time weather data.
- Designed an intuitive user interface with dynamic updates based on user input.
- Implemented error handling and data validation for a seamless user experience.
